

Oracle's Family Pack C Patches and CHRIS Custom Features and Fixes November 25, 2002

Summary: Oracle's Family Pack C introduces several new features. There is a new and improved Workflow process. Users now have the opportunity to individually customize their Worklist to suit their specific work processes. Information can now be sorted and retrieved in a variety of different ways. Family Pack C also lays the groundwork that will be used to build the Self-Service functionality in CHRIS and allow CHRIS to be accessible on all desktops (more information about Self-Service will be provided over the upcoming months). A new EEO Complaints Tracking module is now available. This module allows agencies to manage the various complaints and grievances that are filed. Users are also able to set up and keep track of external employees and other individuals who are part of the complaint process (e.g., Administrative Law Judges, attorneys, witnesses, etc.). There is a new Retroactive Action process that minimizes the work that is involved in processing retroactive actions (like the wage grade pay adjustments that are occasionally made effective retroactively). Once these retroactive actions are processed, the user will receive a notice of subsequent actions that need to be reviewed and possibly corrected as a result of the retroactive action (rather than having to cancel and re-enter these actions).

Along with the implementation of Oracle's Family Pack C, the CHRIS Team has made a number of improvements to CHRIS that will make navigating throughout the application and using CHRIS much easier and more efficient. Several of the "Find" queries have been improved so that the data is retrieved much faster. Additional improvements in this area will be made in subsequent CHRIS enhancements.

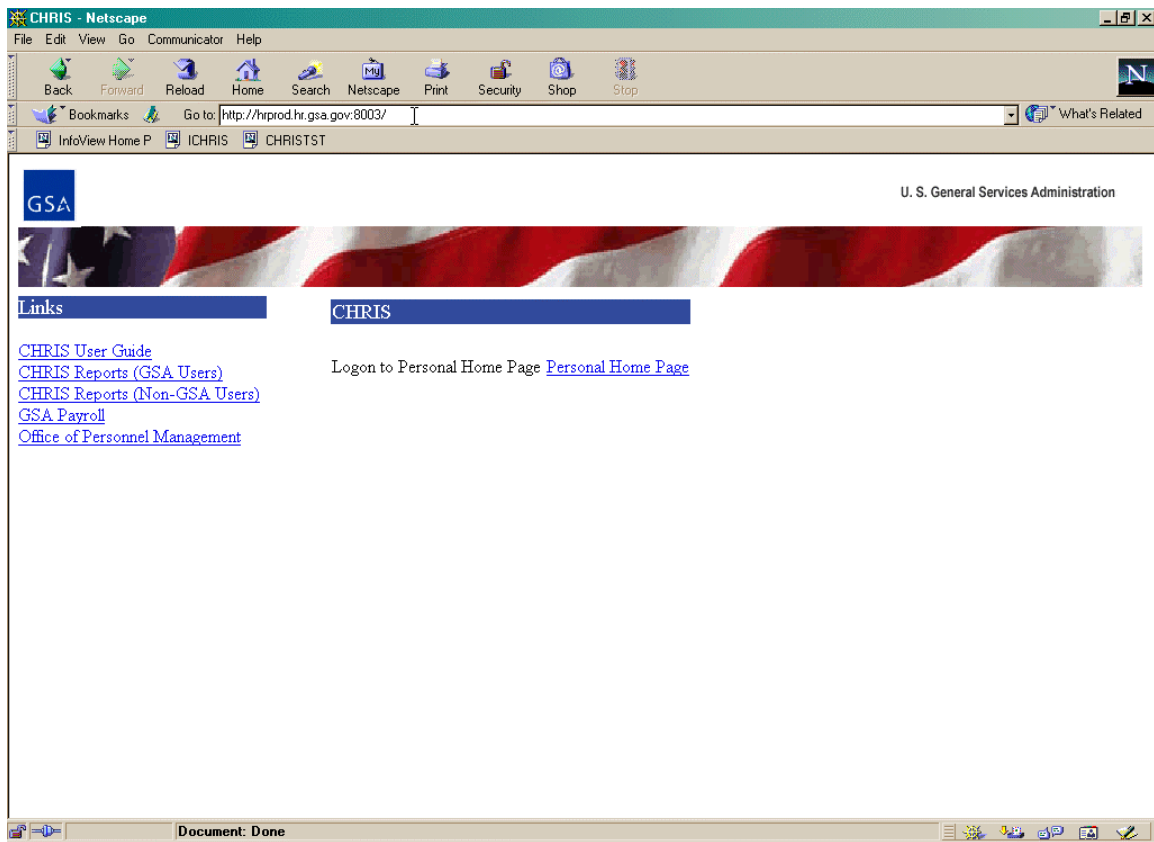

We have put a link to the CHRIS User Guide on the CHRIS Home Page. Chapters are accessible in an Adobe Acrobat format. Chapters that are still being worked on are marked DRAFT. As new chapters are added or as chapters are revised, they will be put on the CHRIS Home page so that they will be easier for the users to access and review.

In order to enter and maintain applicant information more efficiently, we have created a new menu item called, "CHRIS Create Applicant" from the People Menu. This new feature allows users to enter and retrieve information about applicants much more efficiently. Extraneous information has been removed from this area to enable the users to focus only on applicant information.

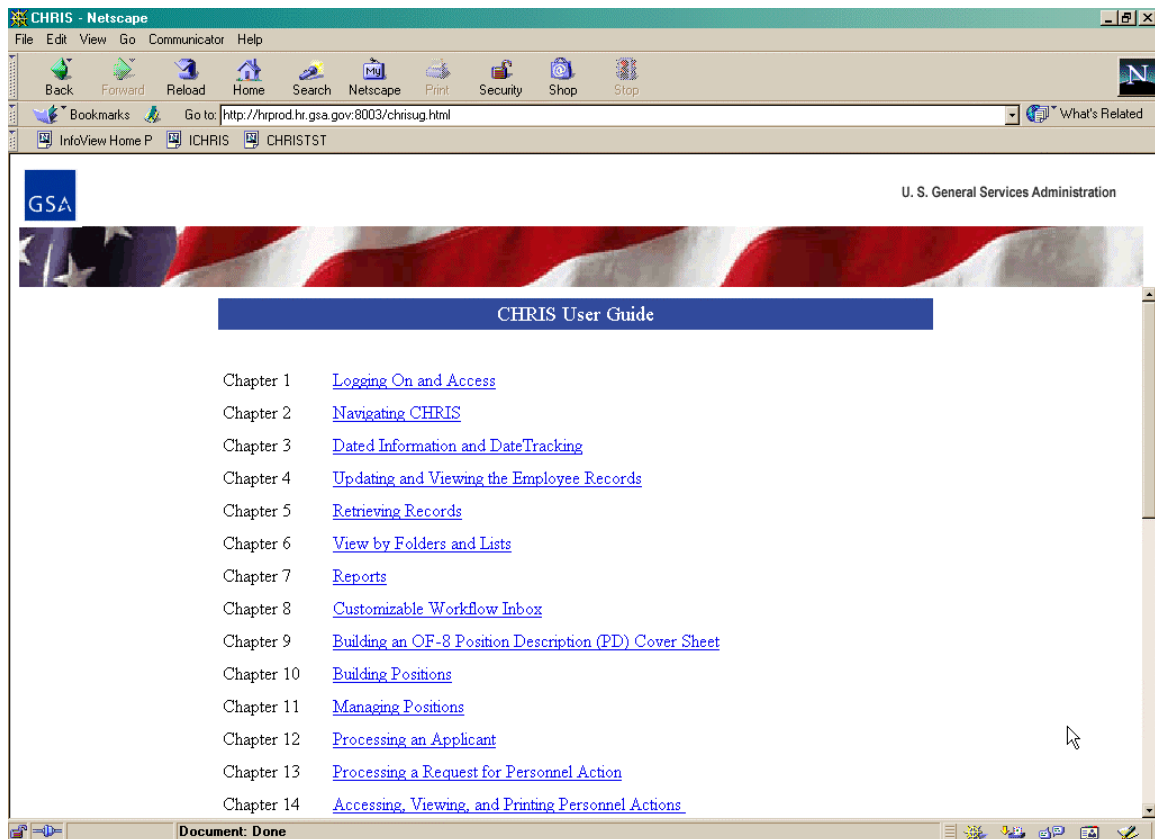

We have moved and/or eliminated several of the Taskflow buttons and the Tabs in some of the Windows to make it easier to navigate to the specific area of CHRIS without going through several unnecessary keystrokes.

The specific improvements are described below.

1. With the load of Family Pack C you will notice a change to your logon screen (<http://hrprod.hr.gsa.gov:8003/>).

Take particular notice of the new [CHRIS User Guide](#) link. This is where all draft and/or final chapters of the User Guide can be found.

As User Guide chapters are completed, they will be accessible from this screen in an Adobe Acrobat format by clicking the chapter link. Any chapter can be printed from your desktop to a printer of your choosing.

2. Clicking on [Personal Home Page](#) now opens a new security window. This window will appear every time a user logs onto CHRIS.

By clicking the button, the user acknowledges that he or she has read and understands the information contained on this page.

CHRIS - FOR OFFICIAL USE ONLY - Netscape

FOR OFFICIAL USE ONLY

WARNING: This is a Government computer system. Your use of it, authorized or unauthorized, constitutes consent to official monitoring. Unauthorized usage of a Government computer system may subject you to criminal prosecution. Evidence of unauthorized use collected during monitoring may be provided to appropriate personnel for administrative, criminal or other action (18 U.S.C. 1030).

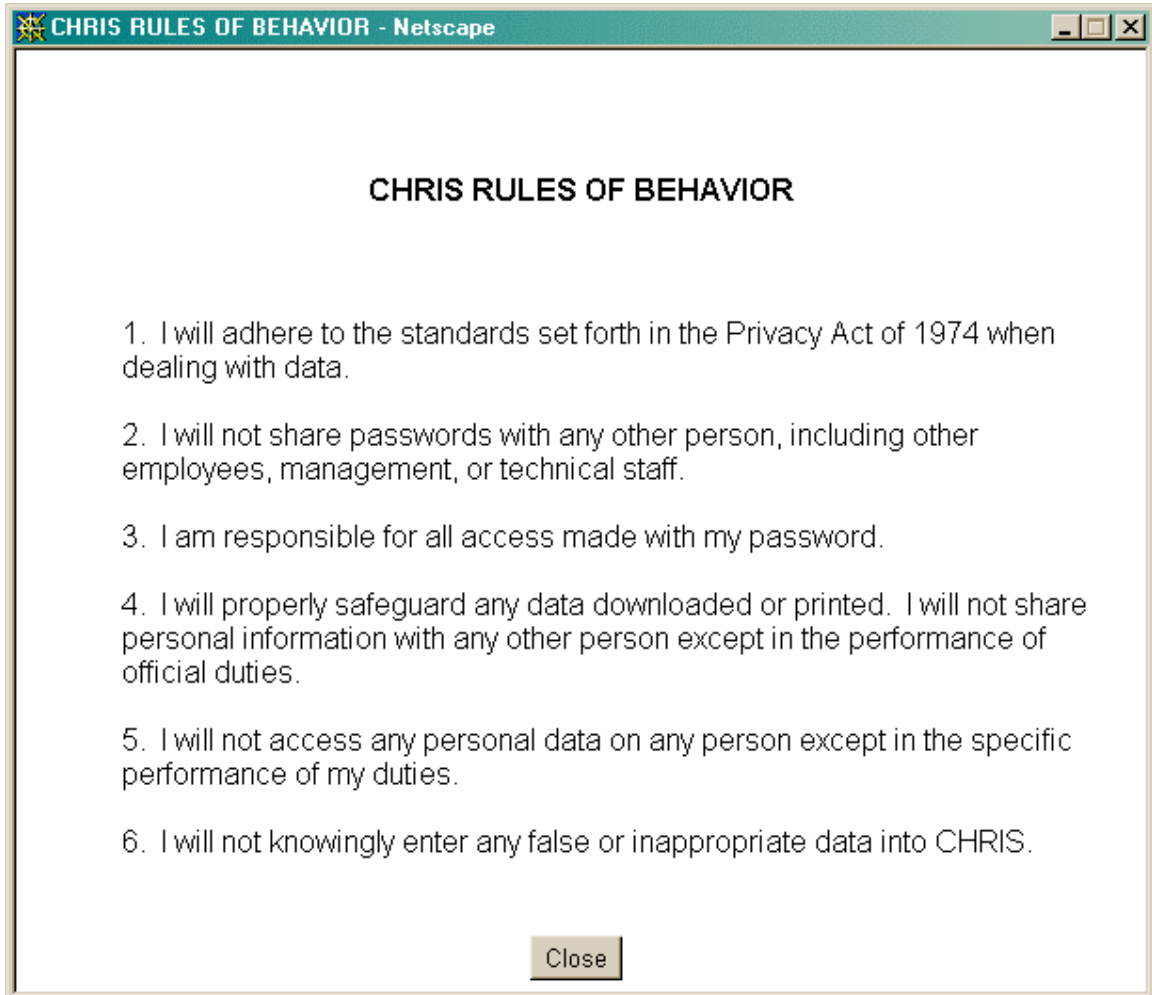

PRIVACY ACT WARNING

Information contained in this system is subject to the Privacy Act of 1974 (5 U.S.C. 552A, as amended). Only authorized persons conducting official business may use personal information contained in this system. Any individual responsible for unauthorized disclosure or misuse of personal information may be subject to fines up to \$5,000.

RULES OF BEHAVIOR

I acknowledge that I have read and understand the rules of behavior for access to CHRIS and that I will abide by these rules and the specific security rules of my agency.

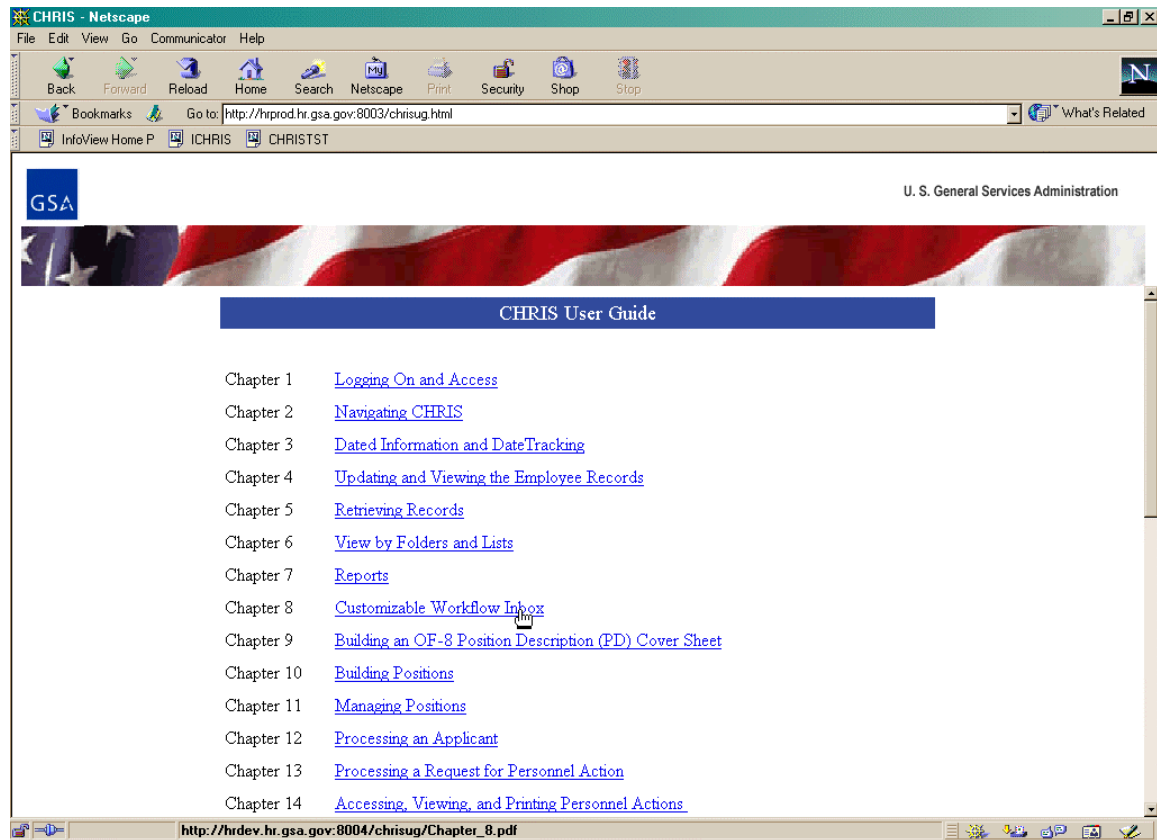

The “CHRIS Rules of Behavior” page should be read, and understood, by **all** CHRIS users. Click on the  button and, after reading, click on the  button. You will return to the prior window where you can click the  button and enter the CHRIS application.

3. After you successfully log into CHRIS, you will notice the new phrase, “Personal Data -- Privacy Act of 1974” displayed at the top of each window.

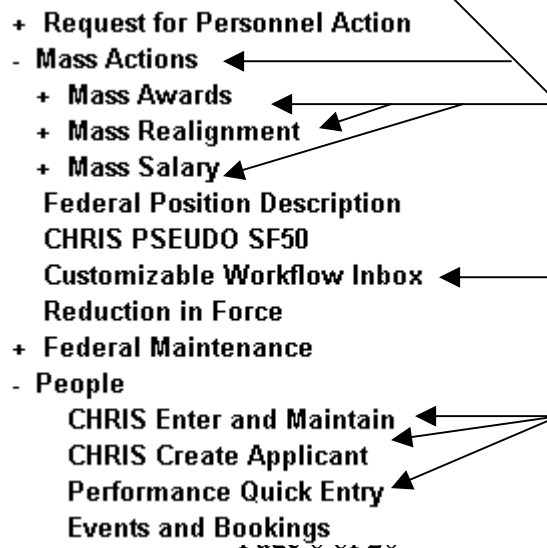

- Oracle has provided a new “Customizable” Workflow Inbox. To learn more about this new feature, from the logon screen click on [CHRIS User Guide](#) and the User Guide Table of Contents will appear.

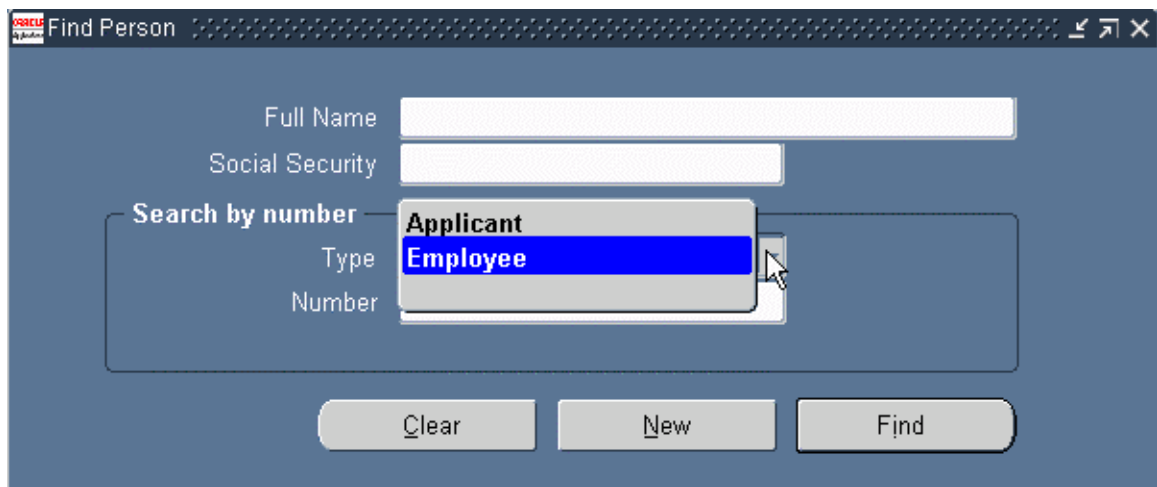

Click on [Customizable Workflow Inbox](#) and it will open in Adobe Acrobat. When finished reviewing and/or printing the chapter, close Adobe Acrobat, go back to the User Guide Table of Contents screen and click the  (NETSCAPE) button or  (EXPLORER) button to return to the Logon screen.

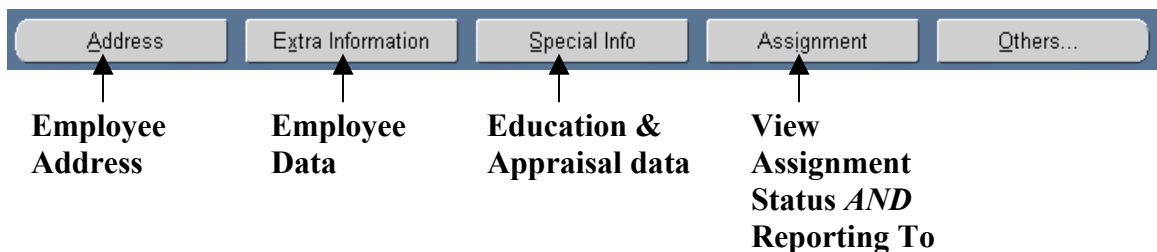

- The Navigator screen now includes new items:

- The “CHRIS Enter and Maintain” link, accessible from the Navigator by double clicking on “People”, replaces the old “Enter and Maintain” link (*used to Find and/or Update an Employee record*). When you double click on “CHRIS Enter and Maintain”, the “Find Person” window opens.

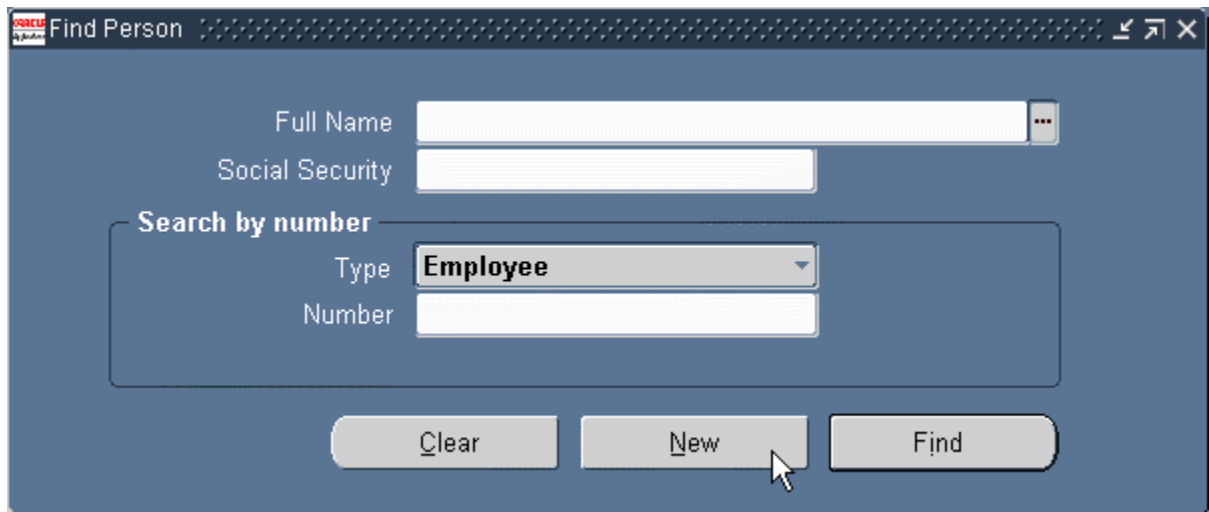

- Complete one of the following fields: Full Name, Social Security Number, or Applicant or Employee Number, and click the  button. The “People” window will then open with the Applicant/Employee data populated.
- At the users’ request, the buttons on the bottom of the People window have been changed to eliminate unnecessary navigation. A user can now quickly access areas within the application that **may** require an update or change.

Address	Extra Information	Special Info	Assignment	Others...
Employee Address	Employee Data	Education & Appraisal data	View Assignment Status AND Reporting To	

8. New functionality designed specifically for the Applicant process is now available from the Navigator. The “CHRIS Create Applicant” link and the “CHRIS Create and Maintain Applicant” window were designed to eliminate unnecessary buttons, tabs, and Information Types, so that the user can quickly complete and navigate through the “Create” and “Accept” applicant process.

From the Navigator, double click on “People”, and then double click on “CHRIS Create Applicant” (*used to “Create” and “Accept” an Applicant*) and the “Find Person” window opens.

The “CHRIS Create Applicant” link and the “CHRIS Create and Maintain Applicant” window only work for “Applicants”. You cannot query an “Employee” or “Ex-Employee” from this window.

Click the  button to create an Applicant. The new “CHRIS Create and Maintain Applicant” window (similar to the “People” window) opens.

*The **New** portion of the “CHRIS Create and Maintain Applicant” window.*

Create an Applicant using established procedures. However, use the “Action” field as shown below:

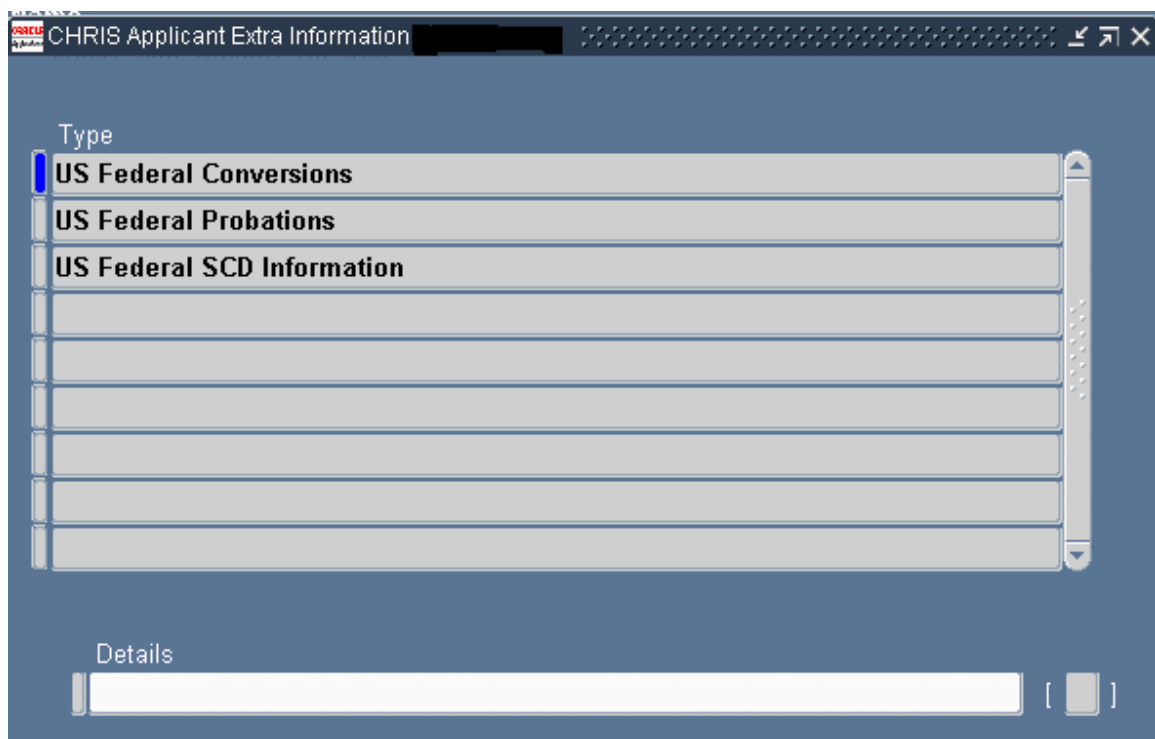

Drop Down for “Action” LOV.

Select “Create Applicant” from the “Action” LOV. The “Action” field fills in with “Create Applicant”, the “Person Type for Action” field fills in with “Applicant” and the “Identification” area fills in with “Applicant”.

At the users' request, the buttons on the bottom of the "CHRIS Create and Maintain Applicant" window have been changed to eliminate unnecessary navigation. A user can now quickly access areas, within the application, which are specific to the applicant process.

The **Extra Information** button now contains only the following Information Types, which are appropriate for an Applicant:

All other Extra Information data is entered during the RPA process, using the appropriate RPA Extra Information Types.

The **Special Info** button now contains only the following Special Information Types, which are appropriate for an Applicant.

Name	Exists
US Fed Education	<input type="checkbox"/>
US Fed Perf Appraisal	<input type="checkbox"/>
	<input type="checkbox"/>
	<input type="checkbox"/>

Start Date	End Date	Detail
24-NOV-2002		

- New person types appear in the “Person Types” portion of the “People” or “CHRIS Create and Maintain Applicant” window.

Person Types

Employee.Ex-applicant

Person Types are:

- Employee – individuals who were data converted into CHRIS and are current Employees
- Applicant – individuals who are entered as an Applicant in CHRIS
- Employee.Ex-applicant – individuals who were entered as an Applicant, Accepted, and then had an Accession action processed in CHRIS
- Ex-employee -- individuals who have been separated from CHRIS

- The only tabs remaining on the “People” and “CHRIS Create and Maintain Applicant” windows are “Personal” and “Office Details”. Complete the “Birth Date” field on the “Personal” tab and the “Email” field on the “Office Details” tab.

Personal **Office Details**

Birth Date

Town of Birth

Region of Birth

Country of Birth

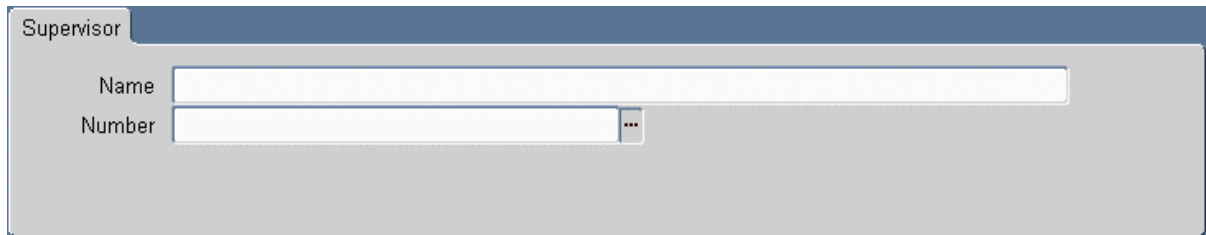

Age

Status

Nationality

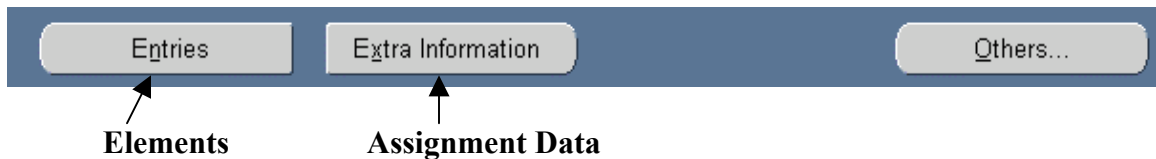

Registered Disabled

11. The only tab remaining on the “Assignment” window is “Supervisor”.

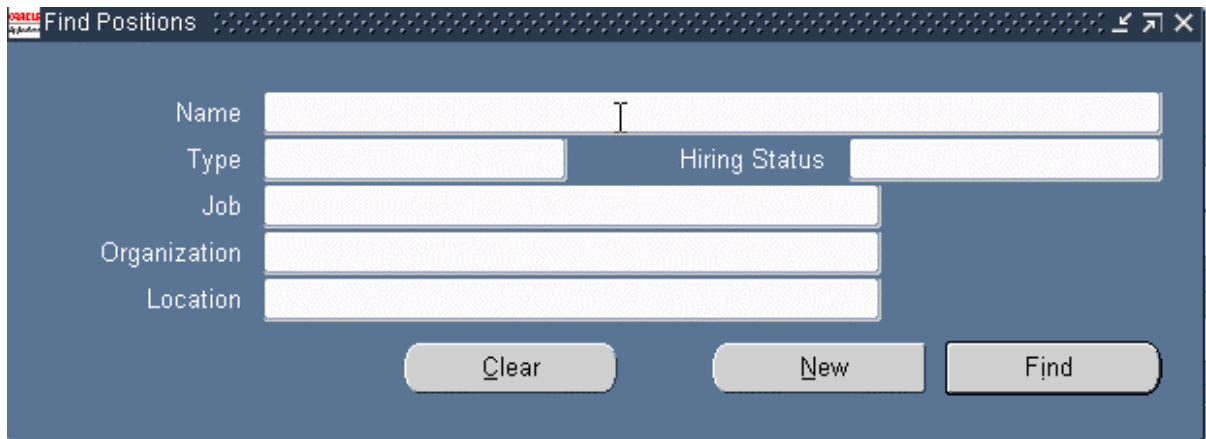

The screenshot shows the 'Supervisor' tab of a window. It contains two input fields: 'Name' and 'Number'. The 'Number' field has a small '...' button to its right.

12. At the users' request, the buttons on the “Assignment” window have been changed to eliminate unnecessary navigation.

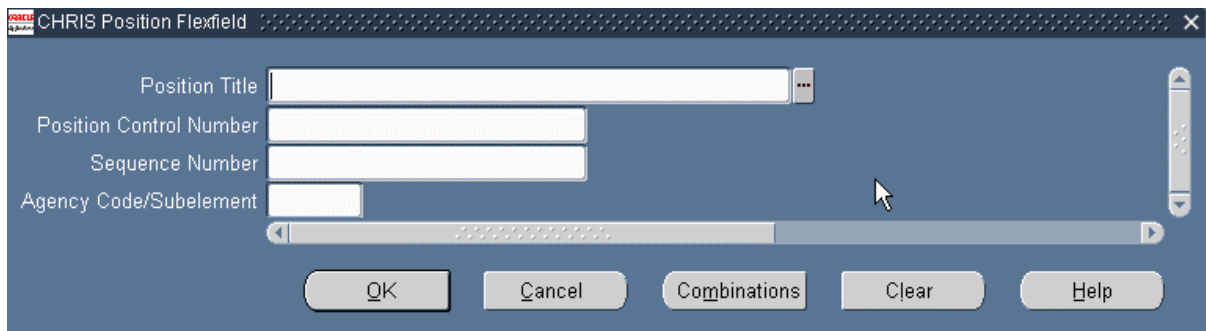

The screenshot shows the bottom of a window with three buttons: 'Entries', 'Extra Information', and 'Others...'. Below the 'Entries' button is an arrow pointing to it with the label 'Elements'. Below the 'Extra Information' button is an arrow pointing to it with the label 'Assignment Data'.

13. The “Find Positions” window performs differently when querying an existing Position. From the Navigator double click on “Work Structures”, and then double click on “Position”, and then double click on “Build and Maintain”. The “Find Positions” window opens.

The screenshot shows the 'Find Positions' window. It has a title bar with 'Find Positions' and standard window controls. The main area contains several input fields: 'Name', 'Type', 'Job', 'Organization', 'Location', and 'Hiring Status'. Below these fields are three buttons: 'Clear', 'New', and 'Find'.

Click in the “Name” field and the “CHRIS Position Flexfield” window opens.

The screenshot shows the 'CHRIS Position Flexfield' window. It has a title bar with 'CHRIS Position Flexfield' and standard window controls. The main area contains several input fields: 'Position Title', 'Position Control Number', 'Sequence Number', and 'Agency Code/Subelement'. Below these fields is a horizontal scrollbar. At the bottom are five buttons: 'OK', 'Cancel', 'Combinations', 'Clear', and 'Help'.

Fill in the appropriate search parameters and click the  button. The “Find Positions” window populates with the position you selected.

The image shows a software window titled "Find Positions". It has a dark blue header bar with standard window controls. Below the header, there are several input fields: "Name" with the text "Human Resources Assistant (OA)...", "Type" with a dropdown arrow, "Hiring Status" with a text field, "Job" with a text field, "Organization" with a text field, and "Location" with a text field. At the bottom of the window, there are three buttons: "Clear", "New", and "Find".

Click the  button and the “Position” window opens with the position data.

14. At the users’ request, the buttons on the bottom of the “Position” window have been changed to eliminate unnecessary navigation. A user can now quickly access areas, within the application, which are specific to the position build and/or review process.

15. At the users’ request, unused Information Types have been removed from the RPA Extra Information area to improve navigation and eliminate user input error.

- US Fed Benefit Danger Pay
- US Fed Benefit EDP Pay
- US Fed Benefit Foreign Lang Prof Pay
- US Fed Benefit Hazard Pay
- US Fed Benefit Imminent Danger Pay
- US Fed Benefit Living Quarters Allowance
- US Fed Benefit Post Differential Amount
- US Fed Benefit Post Differential Percent
- US Fed Benefit Premium Pay
- US Fed Benefit Supplemental Post Allowance
- US Fed Benefit Temporary Lodging Allowance

16. “US Fed Benefit Premium Pay” is not appropriate for entering NF Cola information. Use the RPA Extra Information Type “US Fed Benefit Entitlement” to enter NF Cola information.

The screenshot shows a dialog box titled "US Fed Benefit Entitlement" with a subtitle "Extra PA Request Information". It contains two input fields: "Code" and "Amount or Percent". Below these fields is a horizontal scrollbar. At the bottom of the dialog are four buttons: "OK", "Cancel", "Clear", and "Help". On the left side of the main window, a "Details" tab is visible.

17. A new RPA Extra Information Type (US Fed Termination of Retained Grade) will appear on NOAC’s 702 (Promotion) and 740 (Position Change).

The screenshot shows a list of "Type" options in a main window, including "US Fed Agency Data", "US Fed Payroll Type", "US Fed Performance Appraisal", "US Fed PD Employee Information", and "US Fed Termination of Retained Grade". The "US Fed Termination of Retained Grade" option is selected. A dialog box titled "Extra PA Request Information" is open, showing a "Retained Grade" field with the value "2001/10/06 00:00:00/2002/10/06 00:00:00/06/05/WG/027R/PH" and a "Terminate" field with the value "No". The dialog box has "OK", "Cancel", "Clear", and "Help" buttons. In the background, a "Details" tab is visible with the date "2001/10/06 00:00:00".

- To “Terminate” Grade Retention, click in the “Terminate” field and change the value from “No” to “Yes”, then click the  button and the “Save” Icon. When the action is Approved, the Retained Grade will be terminated.
18. Oracle has changed the period (“.”) delimiter (e.g., 262.S00H0219.T1.11.H40.001), within a field, from  to \. (e.g., from 262.S00H0219.T1.11.H40.001 to 262\S00H0219\T1\11\H40\001).

19. Actions in the CHRIS Cancellation/Correction Folder have been correctly reordered by Oracle:
- Actions appear in descending order by Effective Date (newest to oldest)
 - Then in descending process order [largest number to smallest number (based upon OPM's NOA processing order guidelines)] when multiple actions with the same Effective Date appear.

The screenshot shows a software window titled "Approved Requests for Personnel Action". At the top, there are input fields for "Full Name" and "Social Security". Below these is a "Hide Corrections" button. The main section is titled "CHRIS Cancellation/Correction Folder" and contains a table with the following data:

Effective Date	Process Order	Status	NOA Code	NOA Description	Family
03-NOV-2002	1371	Processed	840	Individual Cash Award	Award/One-Time
22-SEP-2002	1110	Processed	781	Change in Work Schedule	Change - Change
22-SEP-2002	560	Processed	895	Locality Payment	Locality Payment
06-SEP-2002	1371	Processed	840	Individual Cash Award	Award/One-Time
05-MAY-2002	1110	Processed	781	Change in Work Schedule	Change - Change

At the bottom of the window are three buttons: "Re-route", "Cancellation", and "Correction".

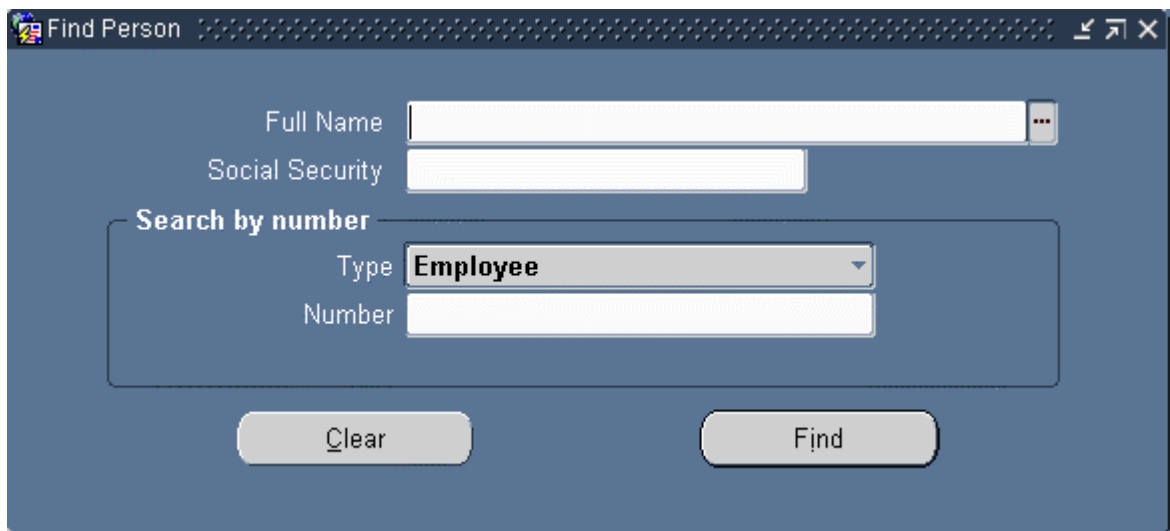

20. Oracle has improved its 002 (Correction) functionality to allow for entering/insertion of retroactive actions and the correction/cancellation of intervening actions. This functionality allows for a retroactive action to be inserted without the cancellation of all subsequent actions. A NOA 002 (Correction) can then be processed on all subsequent actions to bring the record "up-to-date" in both CHRIS and PAR. Actions not impacted by the retroactive action (e.g., Awards) need not be corrected.

NOTE: This functionality was created to allow for processing retroactive Wage Grade Pay Adjustments without the cancellation of intervening actions.

21. A Mass Awards process is now available in CHRIS. The Mass Awards process allows for entering multiple awards, all with the same NOAC and Effective Date, but each individual "can" have a different amount and award type.

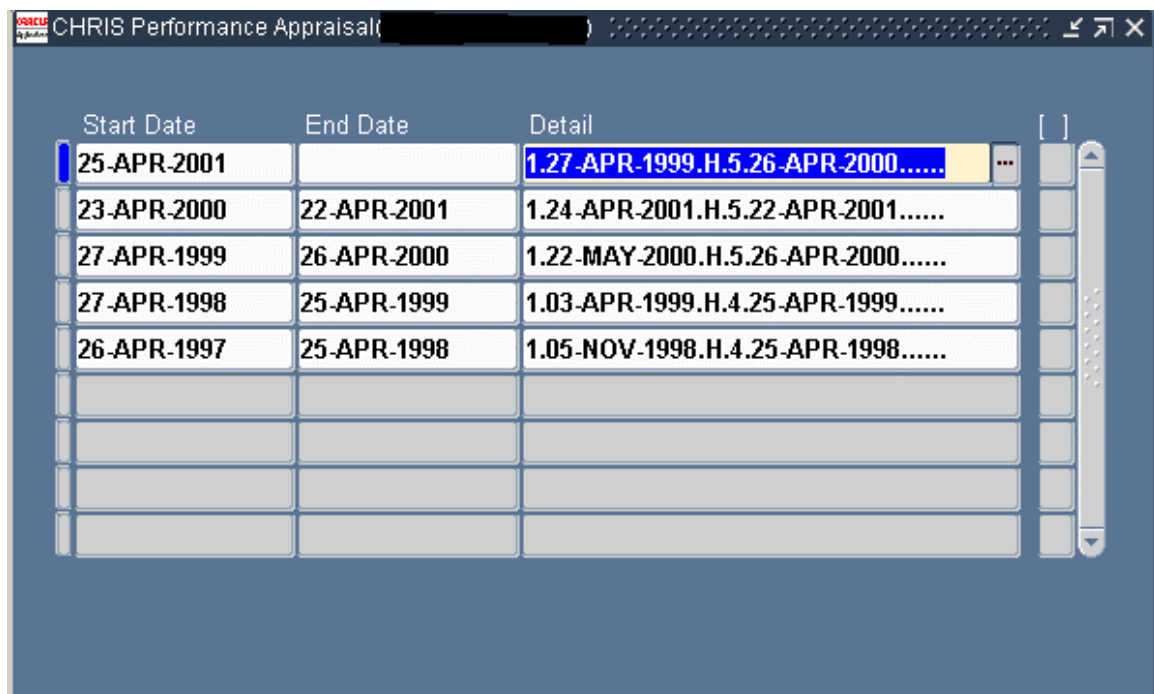

However, because of GSA's unique Award Distribution Code field, a default value for Award Distribution Code of "1" (include in Regular check) has been hard coded (behind the scenes) so that the transactions will process. If the Mass Award is for any code other than "1", then it will have to be entered individually.

22. At the users' request, a new Performance Appraisal entry screen has been developed which allows for the entry of an individual Performance Appraisal, without navigating through multiple screens. From the Navigator, double click on "People" and then "Performance Quick Entry". The "Find Person" window opens:

The "Find Person" window is a blue-themed interface with a title bar. It contains several input fields and buttons. At the top, there is a "Full Name" field with a dropdown arrow. Below it is a "Social Security" field. A section titled "Search by number" contains a "Type" dropdown menu set to "Employee" and a "Number" field. At the bottom, there are two buttons: "Clear" and "Find".

Complete one of the following fields: Full Name, Social Security Number, or Applicant or Employee Number, and click the  button. The Performance Appraisal entry window opens.

The "CHRIS Performance Appraisal" window displays a table of appraisal records. The table has three columns: "Start Date", "End Date", and "Detail". The first row is highlighted in blue. The table contains five rows of data, with the first row being the most recent.

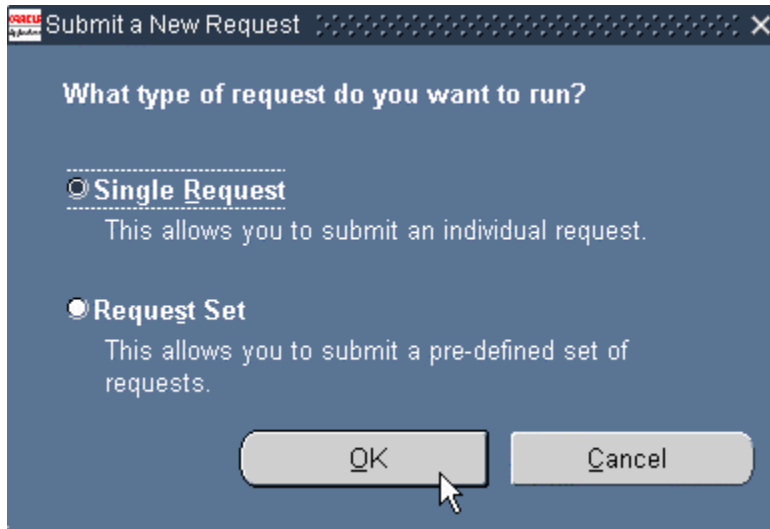

Start Date	End Date	Detail
25-APR-2001		1.27-APR-1999.H.5.26-APR-2000.....
23-APR-2000	22-APR-2001	1.24-APR-2001.H.5.22-APR-2001.....
27-APR-1999	26-APR-2000	1.22-MAY-2000.H.5.26-APR-2000.....
27-APR-1998	25-APR-1999	1.03-APR-1999.H.4.25-APR-1999.....
26-APR-1997	25-APR-1998	1.05-NOV-1998.H.4.25-APR-1998.....

Enter the new Appraisal as usual and "Save".

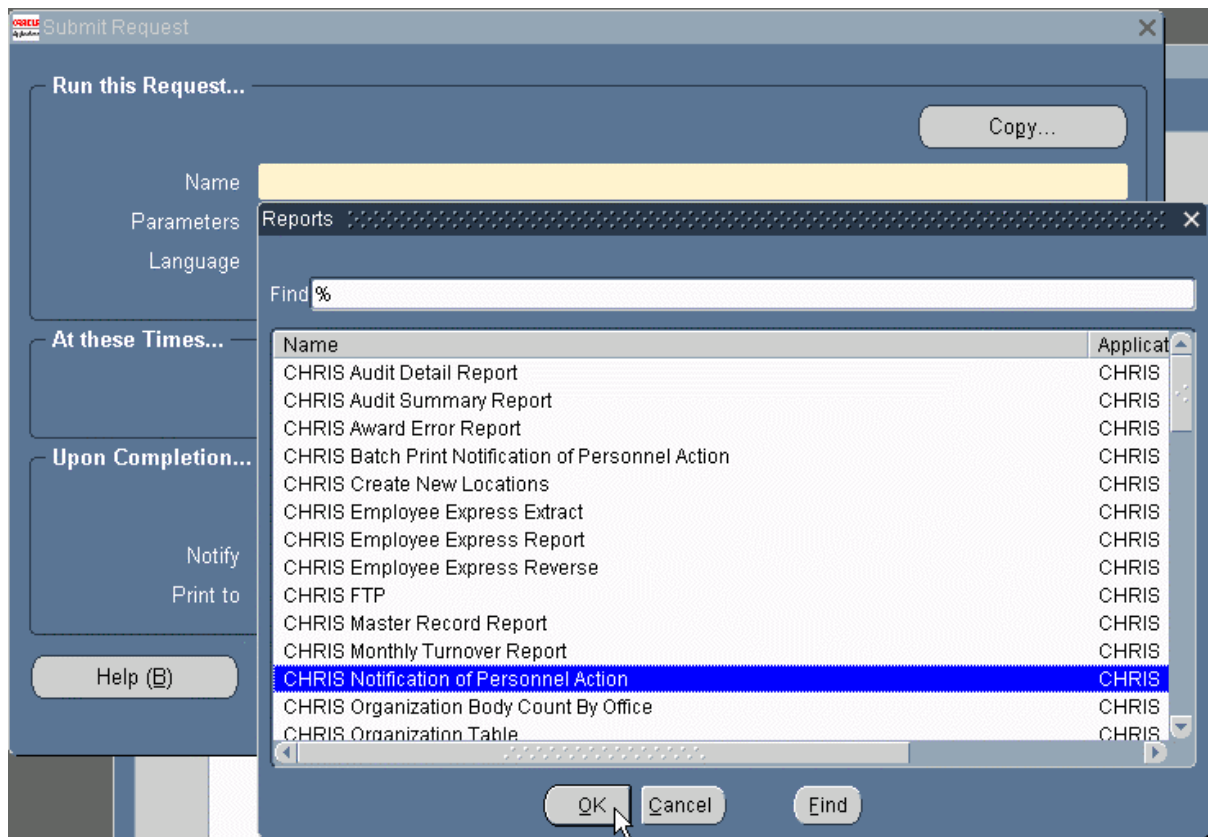

23. The 001 Cancellation RPA now defaults block 5-C with an Authority Code of "ATM". Block 5-E is still user enterable.

24. When an RPA is initiated and a new Position is linked, blocks: 32 Work Schedule, 33 Part Time Hours Per Biweekly Pay Period, 38 Duty Station Code and 39 Duty Station (City-County-State / Overseas Location) are now updated from the “New” (To Side) Position.
25. Oracle has added the FERS Coverage Code field to the RPA Extra Information Type “US Fed Appointment Information”. With this addition to the Core product, we’ve removed the FERS Coverage Code field from our custom RPA Extra Information Type “CHRIS Appointment Information”.
26. Slow performance when querying an individual Notification of Personnel Action (NPA) using Oracle’s “Notification of Personnel Action” or “Notification of Personnel Action Report by SSN” request has been resolved with the creation of a new “custom” concurrent program called “CHRIS Notification of Personnel Action”.

From the Navigator double click on “Processes and Reports”, and then double click on “Submit Processes and Reports”.

The “Submit a New Request” window opens. Click the  button and the “Submit Request” window opens.

Click in the "Name" field, click on the LOV, select "CHRIS Notification of Personnel Action", click the **OK** button and the "Parameters" window opens.

Enter the "Employee Name". If multiple individuals have the same name, select the appropriate one.

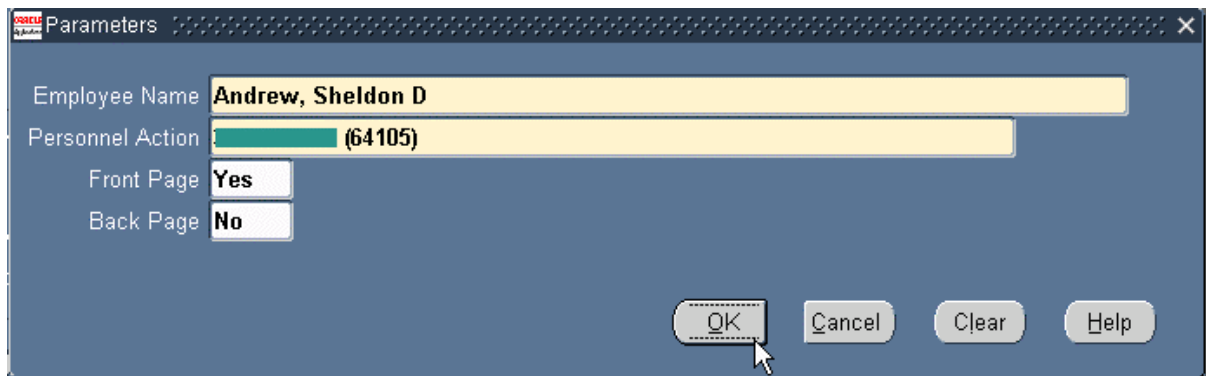

The "Parameters" window has a title bar with a red "X" icon. It contains four input fields: "Employee Name" with the text "Andrew, Sheldon D", "Personnel Action" which is empty and has a dropdown arrow on its right, "Front Page" which is empty, and "Back Page" which is empty. At the bottom right are four buttons: "OK", "Cancel", "Clear", and "Help".

Click in the “Personnel Action” field and then select the personnel action you want to print from the list (as shown below).

The "Personnel Action" window has a title bar with a red "X" icon. It features a "Find" search bar at the top. Below it is a table with three columns: "Personnel Action", "Date", and "NOA (1)". The first row is highlighted in blue. The table lists various personnel actions with their corresponding dates and NOA numbers.

Personnel Action	Date	NOA (1)
(64105)	23-SEP-2001	130 Transfer
(108887)	17-DEC-2001	840 Individual Cash Award
(180684)	30-DEC-2001	881 FEGLI Chg
(180890)	13-JAN-2002	002 Correction
(104138)	13-JAN-2002	894 Pay Adjustment
(180893)	24-FEB-2002	002 Correction
(116405)	24-FEB-2002	702 Promotion
(130349)	13-MAR-2002	840 Individual Cash Award
(161902)	05-MAY-2002	001 Cancellation
(146681)	05-MAY-2002	721 Reassignment
(146683)	05-MAY-2002	781 Change in Work Schedule
(146688)	05-MAY-2002	881 FEGLI Chg
(144681)	19-MAY-2002	001 Cancellation
(145505)	19-MAY-2002	001 Cancellation
(145603)	19-MAY-2002	001 Cancellation
(145416)	19-MAY-2002	001 Cancellation
(141765)	19-MAY-2002	721 Reassignment
(143684)	19-MAY-2002	781 Change in Work Schedule
(144756)	19-MAY-2002	781 Change in Work Schedule
(144821)	19-MAY-2002	881 FEGLI Chg
(169956)	06-SEP-2002	840 Individual Cash Award
(164820)	22-SEP-2002	781 Change in Work Schedule
(164826)	22-SEP-2002	895 Locality Payment

The “Parameters” window now has the “Employee Name, Personnel Action, Front Page, and Back Page” parameters completed.

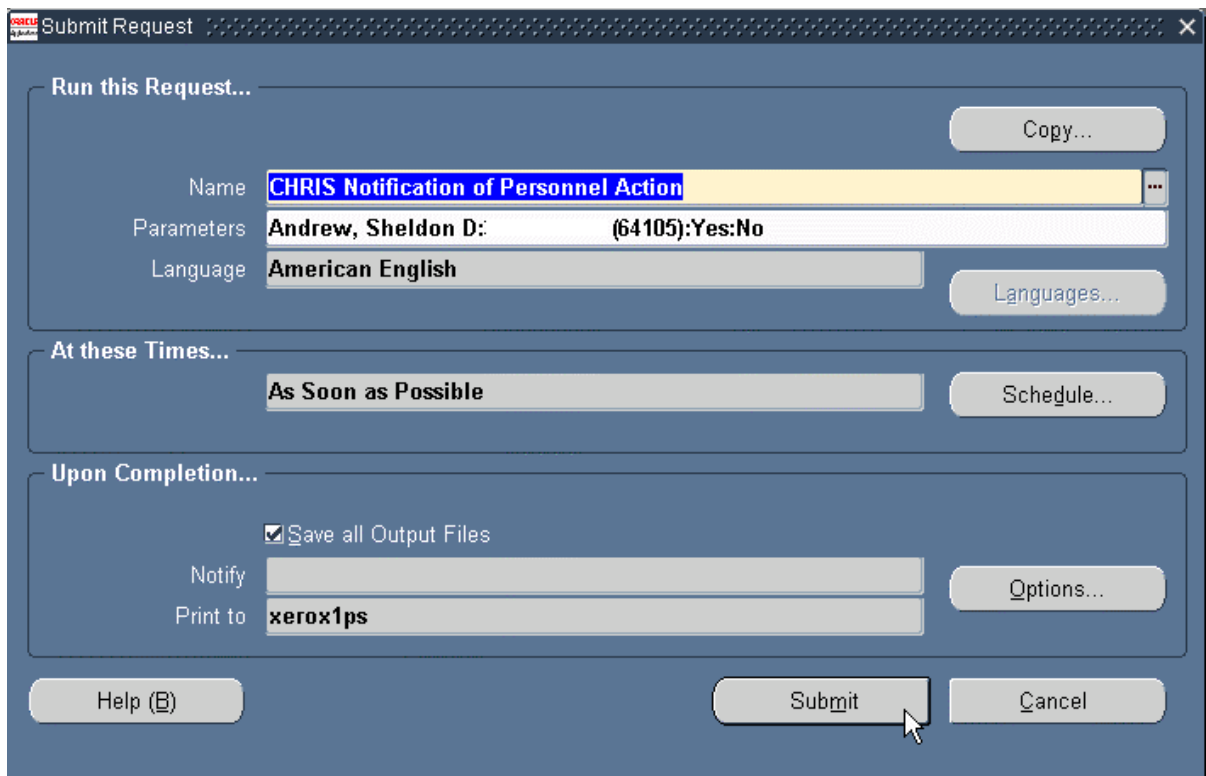

Parameters dialog box showing the following fields:

- Employee Name: **Andrew, Sheldon D**
- Personnel Action: **(64105)**
- Front Page: **Yes**
- Back Page: **No**

Buttons: OK, Cancel, Clear, Help

Click the **OK** button and you return to the “Submit Request” window.

Submit Request dialog box showing the following sections:

- Run this Request...**
 - Name: **CHRIS Notification of Personnel Action**
 - Parameters: **Andrew, Sheldon D: (64105):Yes:No**
 - Language: **American English**
- At these Times...**
 - As Soon as Possible**
- Upon Completion...**
 - ☒ **Save all Output Files**
 - Notify:
 - Print to: **xerox1ps**

Buttons: Copy..., Languages..., Schedule..., Options..., Submit, Cancel, Help (H)

Complete the “Print to” field by clicking on the **Options...** button and selecting your printer. Click the **Submit** button to run the request.

27. The Occupational Series (Series and Series description) is now displayed as part of “Job” on the Position and the Assignment windows (e.g., 0501.Accounting, 0303.Miscellaneous Clerk & Assistant).
28. Duty Station Code (423414091) Gulph Mills, Montgomery, Pennsylvania, is now available.
29. Custom changes to the Oracle product have been implemented to improve query performance on the Cancellation and Correction screen.
